

EZ Load Pipetting Heads

delivering solutions

Tip Loading Made Easy!

- ▣ The EZ-Load pipettor heads simplify the use of disposable tips for multiple channel pipetting. Tip loading and unloading becomes a simple manual process.
- ▣ Specifically-designed tip racks enable a rack of tips to be transferred directly from the package into the EZ-Load head.
- ▣ Simply drop the rack of tips into the head and place the head in the pipettor.
- ▣ A reliable seal is provided for optimal pipetting performance. The top of the pipette tips are sealed against the face seal by the pipettor's automated loading system.
- ▣ Available for all FluidX Xpp and Xps pipetting systems and also compatible with a wide range of other 96 and 384 channel pipettors.

FluidX reserve the right to update and change product information without notice.

EZ Load Pipetting Heads

4 easy steps to load disposable tips and start pipetting!

1

Remove tips from package rack.

2

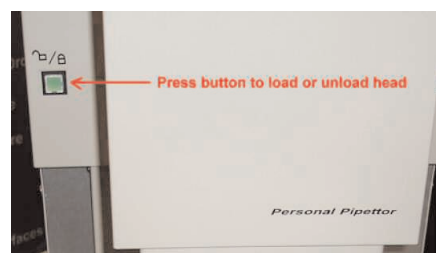

Place tips in EZ-Load head.

3

Load head into pipettor.

4

Press the Load/Unload button.

COMPATIBILITY

96-channel EZ-Load head.

Suitable for use on the Xpp-96H pipetting system using 550ul disposable tips (available from FluidX).

384-channel EZ-Load head.

Suitable for use on the Xpp-384 pipetting system using either 125ul or 50ul ESP tips (available from FluidX).
